Acu-K's Harmonic Chi The Power of Sound in Acupuncture Treatment

Vibrational medicine takes a literal leap into your practice with this stunning workshop designed specifically for acupuncturists. Using Applied Physiology's™ Meridian Tuning Forks, you can now bring the power of harmonic chi balancing into your acupuncture treatments.

Using Energy Kinesiology – the body's "voice of the subconscious" – you will learn how to determine which needled points can benefit from sound stimulation, and which tuning forks to best accomplish this. The holographic nature of command and luo points is addressed to get even greater benefits!

With the sympathetic vibration of needles via the harmonic resonance of these forks to the body's meridian

energy, your acupuncture sessions will move into a different dimension.

Also included is the Tibetan system of Figure 8s, integrated using the meridian alarm (mu) points. You will learn how to identify and balance 14 different Figure 8 patterns in the body, and why they're so important. The power of the Figure 8s can be used before, during and/or after treatment for incredible results. Your clients will sing their way out of your office!
